Our 17 year history assures best practice in privacy, security and the ethical use of data

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantium has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

We all have a responsibility to use data for good

Quantium believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary-

The chips category analysis identified that Older Families (Budget) and Mainstream Young Singles/Couples are the highest-value customer segments, contributing the largest share of total sales.

Trial layout assessment showed that Stores 77 and 88 delivered strong positive uplift in both customer traffic and sales during the trial period.

Store 86 demonstrated increased customer visits but mixed sales performance, indicating the need for further basket and pricing analysis.

Key Category Insights

Customer segment analysis indicates that family-based and mainstream customer groups drive the majority of chips sales.

The highest contribution comes from Older Families (Budget), followed by Young Singles/Couples (Mainstream) and Retirees (Mainstream).

Pack sizes between 150g and 175g dominate customer preference, indicating strong demand for standard-sized products.

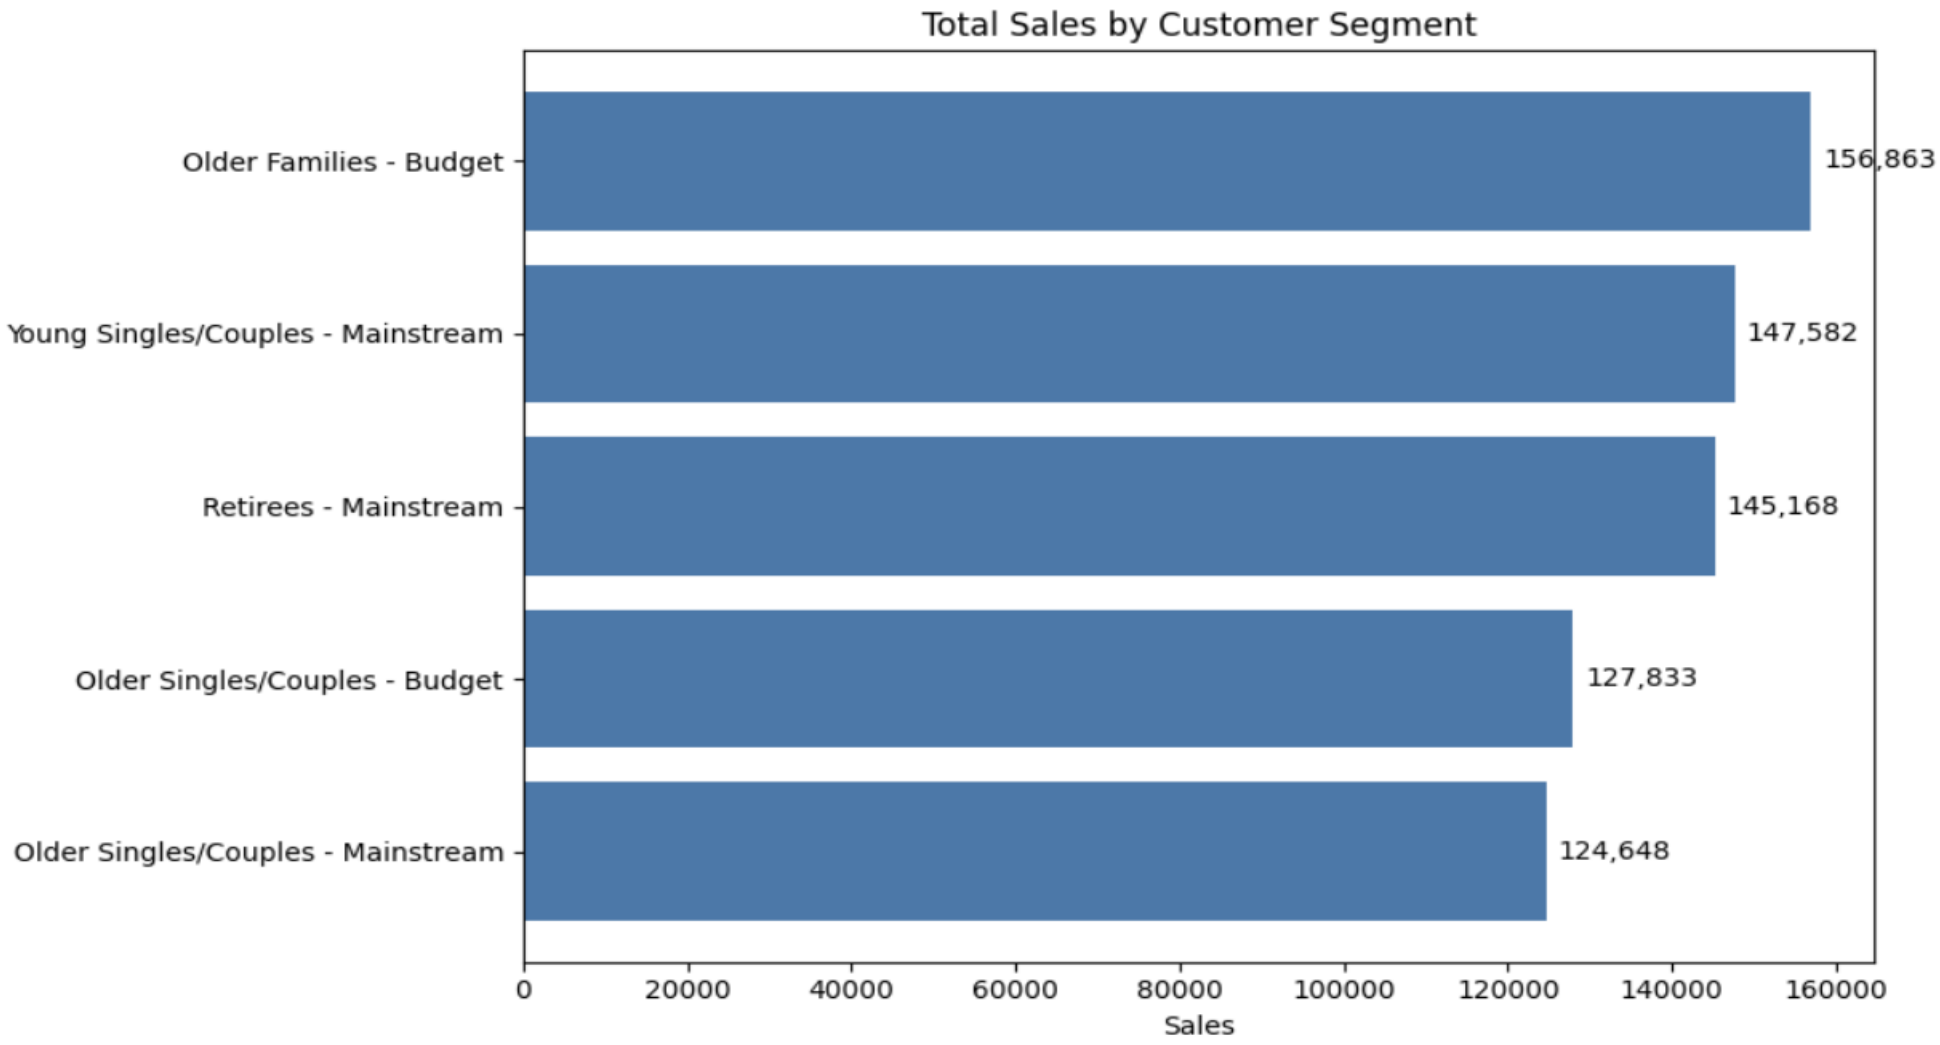
Classification: Confidential

Total Sales by Customer Segment



quantium

Classification: Confidential

Affluence impact

Budget and Mainstream customer groups contribute the majority of category sales.

Budget family segments demonstrate higher purchase frequency and total spend, while premium customers contribute comparatively lower volume.

This suggests that value-driven customers are the key commercial driver for the chips category

Trial Store Performance

The trial layout generated strong positive results in **Stores 77 and 88**, with significant uplift in both sales and customer traffic.

Store 86 recorded increased customer footfall; however, the sales uplift remained inconsistent, suggesting lower average basket value.

Overall, the trial layout has demonstrated a positive commercial impact.

quantium

Classification: Confidential

The control stores were chosen based on their pre-trial performance similarity, ensuring that any differences observed during the trial period could be attributed to the layout change rather than normal store-level variation.

Selected control stores:

Store 77 → Control 233

Store 86 → Control 155

Store 88 → Control 237

Compared with other stores, these control locations showed the closest match in both customer traffic and sales patterns prior to the trial period, making them the most reliable benchmark for performance assessment.
